Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 September 2005.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Objections

1. Claims 27-29 are objected to because of the following informalities: the word "carbody" should be "car body." Claim 28 is necessarily included due to its dependency. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 28 and 29 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claims 28 and 29 fail(s) to correspond in scope with that which applicant(s) regard as the invention can be found in the specification filed 12 November 2003. In that paper, applicant has stated that the lens is painted, and this statement indicates that the invention is different from what is defined in the claim(s) because in claim 28, it says that the perforation openings themselves are painted. This is different from painting the lens.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Graff (U.S. Patent 1,721,903).

Regarding claim 27, Graff discloses at least one vehicle light housing (reference number 1) configured to be arranged on an inner side of a continuous car body (Fig. 2), wherein the car body part has perforation openings (Fig. 2, portion around lens) filled in with light transmissive material (reference number 5) in an area behind which the at least one vehicle light housing is arranged (Fig. 2), at least one illumination element arranged in the at least one vehicle light housing (Fig. 2), wherein light emitted by the at least one illumination element passes through the perforation openings when the at least one illumination element is switched on (Fig. 2).

Allowable Subject Matter

5. Claims 1-26 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter.

The prior art fails to disclose a vehicle light having the following features:

1) a light-transmissive coating applied onto the exterior side of the lens, wherein the light-transmissive coating has a color matching a color of a coating of the vehicle part and wherein the light-transmissive coating has a thickness such that the lens when the at least one illumination element is switched off is invisible from the exterior of the vehicle and such that the lens allows light emitted by the at least one illumination element to pass through when the at least one illumination element is switched on as recited in claim 1; and

2) a light-transmissive coating applied onto an outer side of the vehicle part, wherein the light-transmissive coating has a thickness in an area of the lens such that , when the at least one illumination element is switched off, the lens is invisible from the exterior of the vehicle and such that light emitted by the at one illumination element passes through the coating when the at least one illumination element is switched on as recited in claim 26.

Response to Arguments

7. Applicant's arguments with respect to claims 27-29 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharon E. Payne whose telephone number is (571) 272-2379. The examiner can normally be reached on regular business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
